

RIVER

RIVER

La struttura è in legno con componenti assemblabili tramite baionette metalliche e perni filettati. Il molleggio è ottenuto con nastri elastici in tensione. Le imbottiture sono in poliuretano espanso a quote differenziate rivestite con tessuto di prefodera accoppiato. I cuscini dei sedili in poliuretano espanso (densità 35) e degli schienali (densità 18), sono ricoperti da ovatta acrilica. Il sottosedile può essere sostituito con il letto pieghevole che consente di non rimuovere i cuscini all'atto della trasformazione a letto.

Structure en bois avec éléments fixés au moyen de baïonnettes métalliques et axes taraudés. Suspension par sangles élastiques tendues. Garnissage de la structure en mousse polyuréthane de densité différente recouverte de tissu accouplé. Coussins de l'assise en mousse polyuréthane (densité 35) et coussins du dossier en mousse polyuréthane (densité 18), recouverts d'ouate acrylique. La base de l'assise peut être remplacée par un lit pliable qui permet de ne pas enlever les coussins lors de la conversion.
